Overview of Our Firm

Boutwell Fay LLP practices in the areas of employee benefits and the Employee Retirement Income Security Act of 1974 (known as "ERISA"). The background of the Firm's attorneys includes practice at national law firms. These attorneys bring to their practice a high degree of sophistication coupled with a unique sensitivity to their clients' overall business and legal needs. While the Firm provides a quality of legal services normally associated with large law firms, the smaller size of the Firm allows it to be more accessible to its clients, and more responsive to their needs.

The Firm's dedication to its clients includes a commitment to provide practical and cost-effective solutions to complex legal problems. **Boutwell Fay LLP** has focused on keeping its overhead low and its staffing lean. This enables the Firm to work in a more efficient manner, and to pass the resultant savings on to its clients.

Boutwell Fay LLP attorneys are active in professional and trade associations related to their practice areas. The Firm's attorneys have served on committees of the Western Pension & Benefits Conference and the National Institute of Pension Administrators.

The Firm provides legal counsel to a broad range of business, consulting and financial services firms. Its clients include private employers, plan service providers, financial institutions, government agencies and pension plans.
